

Selected Portions of the Act 250 Statute

10 V.S.A. § 6001. Definitions

In this chapter:

(3)(A) "Development" means each of the following:

(i) The construction of improvements on a tract or tracts of land, owned or controlled by a person, involving more than 10 acres of land within a radius of five miles of any point on any involved land, for commercial or industrial purposes in a municipality that has adopted permanent zoning and subdivision bylaws.

(ii) The construction of improvements for commercial or industrial purposes on more than one acre of land within a municipality that has not adopted permanent zoning and subdivision bylaws.

(iii) The construction of improvements for commercial or industrial purposes on a tract or tracts of land, owned or controlled by a person, involving more than one acre of land within a municipality that has adopted permanent zoning and subdivision bylaws, if the municipality in which the proposed project is located has elected by ordinance, adopted under 24 V.S.A. chapter 59, to have this jurisdiction apply.

(iv) The construction of housing projects such as cooperatives, condominiums, or dwellings, or construction or maintenance of mobile homes or mobile home parks, with 10 or more units, constructed or maintained on a tract or tracts of land, owned or controlled by a person, within a radius of five miles of any point on any involved land, and within any continuous period of five years. However:

...

(D) The word "development" does **not** include:

(i) The construction of improvements for farming, logging, or forestry purposes below the elevation of 2,500 feet.

...

(8) "Productive forest soils" means those soils which are not primary agricultural soils but which have a reasonable potential for commercial forestry and which have not been developed. In order to qualify as productive forest soils, the land containing such soils shall be of a size and location, relative to adjoining land uses, natural condition, and ownership patterns so that those soils will be capable of supporting or contributing to a commercial forestry operation. Land use on those soils may include commercial timber harvesting and specialized forest uses, such as maple sugar or Christmas tree production.

....

(11) "Lot" means any undivided interest in land, whether freehold or leasehold, including interests created by trusts, partnerships, corporations, cotenancies, and contracts.

(12) "Necessary wildlife habitat" means concentrated habitat which is identifiable and is demonstrated as being decisive to the survival of a species of wildlife at any period in its life including breeding and migratory periods.

....

(15) "Primary agricultural soils" means each of the following:

(A) An important farmland soils map unit that the Natural Resources Conservation Service of the U.S. Department of Agriculture (NRCS) has identified and determined to have a rating of prime, statewide, or local importance, unless the District Commission determines that the soils within the unit have lost their agricultural potential. In determining that soils within an important farmland soils map unit have lost their agricultural potential, the Commission shall consider:

(i) impacts to the soils relevant to the agricultural potential of the soil from previously constructed improvements;

(ii) the presence on the soils of a Class I or Class II wetland under chapter 37 of this title;

(iii) the existence of topographic or physical barriers that reduce the accessibility of the rated soils so as to cause their isolation and that cannot reasonably be overcome; and

(iv) other factors relevant to the agricultural potential of the soils, on a site-specific basis, as found by the Commission after considering the recommendation, if any, of the Secretary of Agriculture, Food and Markets.

(B) Soils on the project tract that the District Commission finds to be of agricultural importance, due to their present or recent use for agricultural activities and that have not been identified by the NRCS as important farmland soil map units.

....

(19)(A) "Subdivision" means each of the following:

(i) A tract or tracts of land, owned or controlled by a person, which the person has partitioned or divided for the purpose of resale into 10 or more lots within a radius of five miles of any point on any lot, or within the jurisdictional area of the same District Commission, within any continuous period of five years. In determining the number of lots, a lot shall be counted if any portion is within five miles or within the jurisdictional area of the same District Commission.

(ii) A tract or tracts of land, owned or controlled by a person, which the person has partitioned or divided for the purpose of resale into six or more lots, within a continuous period of five years, in a municipality which does not have duly adopted permanent zoning and subdivision bylaws.

(iii) A tract or tracts of land, owned or controlled by a person, which have been partitioned or divided for the purpose of resale into five or more separate parcels of any size within a radius of five miles of any point on any such parcel, and within any period of ten years, by public auction.

(I) In this subdivision (iii), "public auction" means any auction advertised or publicized in any manner, or to which more than ten persons have been invited.

(II) If sales described under this subdivision (iii) are of interests that, when sold by means other than public auction, are exempt from the provisions of this chapter under the provisions of subsection 6081(b) of this title, the fact that these interests are sold by means of a public auction shall not, in itself, create a requirement for a permit under this chapter.

(B) The word "subdivision" shall not include each of the following:

(i) a lot or lots created for the purpose of conveyance to the State or to a qualified organization, as defined under section 6301a of this title, if the land to be transferred includes and will preserve a segment of the Long Trail;

(ii) a lot or lots created for the purpose of conveyance to the State or to a "qualified holder" of "conservation rights and interest," as defined in section 821 of this title.

...

(22) "Farming" means:

(A) the cultivation or other use of land for growing food, fiber, Christmas trees, maple sap, or horticultural and orchard crops; or

(B) the raising, feeding, or management of livestock, poultry, fish, or bees; or

(C) the operation of greenhouses; or

(D) the production of maple syrup; or

(E) the on-site storage, preparation and sale of agricultural products principally produced on the farm; or

(F) the on-site storage, preparation, production, and sale of fuel or power from agricultural products or wastes principally produced on the farm; or

(G) the raising, feeding, or management of four or more equines owned or boarded by the farmer, including training, showing, and providing instruction and lessons in riding, training, and the management of equines.

.....

The Act 250 Criteria

- **§ 6086. Issuance of permit; conditions and criteria**

(a) Before granting a permit, the District Commission shall find that the subdivision or development:

(1) Will not result in undue water or air pollution. In making this determination it shall at least consider: the elevation of land above sea level; and in relation to the flood plains, the nature of soils and subsoils and their ability to adequately support waste disposal; the slope of the land and its effect on effluents; the availability of streams for disposal of effluents; and the applicable Health and Environmental Conservation Department regulations.

(A) Headwaters. A permit will be granted whenever it is demonstrated by the applicant that, in addition to all other applicable criteria, the development or subdivision will meet any applicable Health and Environmental Conservation Department regulation regarding reduction of the quality of the ground or surface waters flowing through or upon lands which are not devoted to intensive development, and which lands are:

(i) headwaters of watersheds characterized by steep slopes and shallow soils; or

(ii) drainage areas of 20 square miles or less; or

(iii) above 1,500 feet elevation; or

(iv) watersheds of public water supplies designated by the Agency of Natural Resources; or

(v) areas supplying significant amounts of recharge waters to aquifers.

(B) Waste disposal. A permit will be granted whenever it is demonstrated by the applicant that, in addition to all other applicable criteria, the development or subdivision will meet any applicable Health and Environmental Conservation Department regulations regarding the disposal of wastes, and will not involve the injection of waste materials or any harmful or toxic substances into ground water or wells.

(C) Water conservation. A permit will be granted whenever it is demonstrated by the applicant that, in addition to all other applicable criteria, the design has considered water conservation, incorporates multiple use or recycling where technically and economically practical, utilizes the best available technology for such applications, and provides for continued efficient operation of these systems.

(D) Floodways. A permit will be granted whenever it is demonstrated by the applicant that, in addition to all other applicable criteria:

(i) the development or subdivision of lands within a floodway will not restrict or divert the flow of flood waters, and endanger the health, safety and welfare of the public or of riparian owners during flooding; and

(ii) the development or subdivision of lands within a floodway fringe will not significantly increase the peak discharge of the river or stream within or downstream from the area of development and endanger the health, safety, or welfare of the public or riparian owners during flooding.

(E) Streams. A permit will be granted whenever it is demonstrated by the applicant that, in addition to all other applicable criteria, the development or subdivision of lands on or adjacent to the banks of a stream will, whenever feasible, maintain the natural condition of the stream, and will not endanger the health, safety, or welfare of the public or of adjoining landowners.

(F) Shorelines. A permit will be granted whenever it is demonstrated by the applicant that, in addition to all other criteria, the development or subdivision of shorelines must of necessity be located on a shoreline in order to fulfill the purpose of the development or subdivision, and the development or subdivision will, insofar as possible and reasonable in light of its purpose:

(i) retain the shoreline and the waters in their natural condition;

(ii) allow continued access to the waters and the recreational opportunities provided by the waters;

(iii) retain or provide vegetation which will screen the development or subdivision from the waters; and

(iv) stabilize the bank from erosion, as necessary, with vegetation cover.

(G) Wetlands. A permit will be granted whenever it is demonstrated by the applicant, in addition to other criteria, that the development or subdivision will not violate the rules of the Secretary of Natural Resources, as adopted under chapter 37 of this title, relating to significant wetlands.

(2) Does have sufficient water available for the reasonably foreseeable needs of the subdivision or development.

(3) Will not cause an unreasonable burden on an existing water supply, if one is to be utilized.

(4) Will not cause unreasonable soil erosion or reduction in the capacity of the land to hold water so that a dangerous or unhealthy condition may result.

(5)(A) Will not cause unreasonable congestion or unsafe conditions with respect to use of the highways, waterways, railways, airports and airways, and other means of transportation existing or proposed.

(B) As appropriate, will incorporate transportation demand management strategies and provide safe access and connections to adjacent lands and facilities and to existing and planned pedestrian, bicycle, and transit networks and services. In determining appropriateness under this subdivision (B), the District Commission shall consider whether such a strategy, access, or connection constitutes a measure that a reasonable person would take given the type, scale, and transportation impacts of the proposed development or subdivision.

(6) Will not cause an unreasonable burden on the ability of a municipality to provide educational services.

(7) Will not place an unreasonable burden on the ability of the local governments to provide municipal or governmental services.

(8) Will not have an undue adverse effect on the scenic or natural beauty of the area, aesthetics, historic sites or rare and irreplaceable natural areas.

(A) Necessary wildlife habitat and endangered species. A permit will not be granted if it is demonstrated by any party opposing the applicant that a development or subdivision will destroy or significantly imperil necessary wildlife habitat or any endangered species; and

(i) the economic, social, cultural, recreational, or other benefit to the public from the development or subdivision will not outweigh the economic, environmental, or recreational loss to the public from the destruction or imperilment of the habitat or species; or

(ii) all feasible and reasonable means of preventing or lessening the destruction, diminution, or imperilment of the habitat or species have not been or will not continue to be applied; or

(iii) a reasonably acceptable alternative site is owned or controlled by the applicant which would allow the development or subdivision to fulfill its intended purpose.

(9) Is in conformance with a duly adopted capability and development plan, and land use plan when adopted. However, the legislative findings of subdivisions 7(a)(1)

through (19) of Act 85 of 1973 shall not be used as criteria in the consideration of applications by a District Commission.

(A) Impact of growth. In considering an application, the District Commission shall take into consideration the growth in population experienced by the town and region in question and whether or not the proposed development would significantly affect their existing and potential financial capacity to reasonably accommodate both the total growth and the rate of growth otherwise expected for the town and region and the total growth and rate of growth which would result from the development if approved. After considering anticipated costs for education, highway access and maintenance, sewage disposal, water supply, police and fire services, and other factors relating to the public health, safety, and welfare, the District Commission shall impose conditions which prevent undue burden upon the town and region in accommodating growth caused by the proposed development or subdivision. Notwithstanding section 6088 of this title, the burden of proof that proposed development will significantly affect existing or potential financial capacity of the town and region to accommodate such growth is upon any party opposing an application, excepting however, where the town has a duly adopted capital improvement program the burden shall be on the applicant.

(B) Primary agricultural soils. A permit will be granted for the development or subdivision of primary agricultural soils only when it is demonstrated by the applicant that, in addition to all other applicable criteria, either, the subdivision or development will not result in any reduction in the agricultural potential of the primary agricultural soils; or:

(i) the development or subdivision will not significantly interfere with or jeopardize the continuation of agriculture or forestry on adjoining lands or reduce their agricultural or forestry potential;

(ii) except in the case of an application for a project located in a designated area listed in subdivision 6093(a)(1) of this title, there are no lands other than primary agricultural soils owned or controlled by the applicant which are reasonably suited to the purpose of the development or subdivision;

(iii) except in the case of an application for a project located in a designated area listed in subdivision 6093(a)(1) of this title, the subdivision or development has been planned to minimize the reduction of agricultural potential of the primary agricultural soils through innovative land use design resulting in compact development patterns, so that the remaining primary agricultural soils on the project tract are capable of supporting or contributing to an economic or commercial agricultural operation; and

(iv) suitable mitigation will be provided for any reduction in the agricultural potential of the primary agricultural soils caused by the development or subdivision, in accordance with section 6093 of this title and rules adopted by the Natural Resources Board.

(C) Productive forest soils. A permit will be granted for the development or subdivision of productive forest soils only when it is demonstrated by the applicant that, in addition to all other applicable criteria, either, the subdivision or development will not result in any reduction in the potential of those soils for commercial forestry; or:

(i) the development or subdivision will not significantly interfere with or jeopardize the continuation of agriculture or forestry on adjoining lands or reduce their agricultural or forestry potential; and

(ii) except in the case of an application for a project located in a designated growth center, there are no lands other than productive forest soils owned or controlled by the applicant which are reasonably suited to the purpose of the development or subdivision; and

(iii) except in the case of an application for a project located in a designated growth center, the subdivision or development has been planned to minimize the reduction of the potential of those productive forest soils through innovative land use design resulting in compact development patterns, so that the remaining forest soils on the project tract may contribute to a commercial forestry operation.

(D) Earth resources. A permit will be granted whenever it is demonstrated by the applicant, in addition to all other applicable criteria, that the development or subdivision of lands with high potential for extraction of mineral or earth resources, will not prevent or significantly interfere with the subsequent extraction or processing of the mineral or earth resources.

(E) Extraction of earth resources. A permit will be granted for the extraction or processing of mineral and earth resources, including fissionable source material:

(i) When it is demonstrated by the applicant that, in addition to all other applicable criteria, the extraction or processing operation and the disposal of waste will not have an unduly harmful impact upon the environment or surrounding land uses and development; and

(ii) Upon approval by the District Commission of a site rehabilitation plan that ensures that upon completion of the extracting or processing operation the site will be left by the applicant in a condition suited for an approved alternative use or development. A permit will not be granted for the recovery or extraction of mineral or

earth resources from beneath natural water bodies or impoundments within the State, except that gravel, silt, and sediment may be removed pursuant to the rules of the Agency of Natural Resources, and natural gas and oil may be removed pursuant to the rules of the Natural Gas and Oil Resources Board.

(F) Energy conservation. A permit will be granted when it has been demonstrated by the applicant that, in addition to all other applicable criteria, the planning and design of the subdivision or development reflect the principles of energy conservation, including reduction of greenhouse gas emissions from the use of energy, and incorporate the best available technology for efficient use or recovery of energy. An applicant seeking an affirmative finding under this criterion shall provide evidence that the subdivision or development complies with the applicable building energy standards under 30 V.S.A. § 51 or 53.

(G) Private utility services. A permit will be granted for a development or subdivision which relies on privately owned utility services or facilities, including central sewage or water facilities and roads, whenever it is demonstrated by the applicant that, in addition to all other applicable criteria, the privately owned utility services or facilities are in conformity with a capital program or plan of the municipality involved, or adequate surety is provided to the municipality and conditioned to protect the municipality in the event that the municipality is required to assume the responsibility for the services or facilities.

(H) Costs of scattered development. The District Commission will grant a permit for a development or subdivision which is not physically contiguous to an existing settlement whenever it is demonstrated that, in addition to all other applicable criteria, the additional costs of public services and facilities caused directly or indirectly by the proposed development or subdivision do not outweigh the tax revenue and other public benefits of the development or subdivision such as increased employment opportunities or the provision of needed and balanced housing accessible to existing or planned employment centers.

(J) Public utility services. A permit will be granted for a development or subdivision whenever it is demonstrated that, in addition to all other applicable criteria, necessary supportive governmental and public utility facilities and services are available or will be available when the development is completed under a duly adopted capital program or plan, an excessive or uneconomic demand will not be placed on such facilities and services, and the provision of such facilities and services has been planned on the basis of a projection of reasonable population increase and economic growth.

(K) Development affecting public investments. A permit will be granted for the development or subdivision of lands adjacent to governmental and public utility

facilities, services, and lands, including highways, airports, waste disposal facilities, office and maintenance buildings, fire and police stations, universities, schools, hospitals, prisons, jails, electric generating and transmission facilities, oil and gas pipe lines, parks, hiking trails and forest and game lands, when it is demonstrated that, in addition to all other applicable criteria, the development or subdivision will not unnecessarily or unreasonably endanger the public or quasi-public investment in the facility, service, or lands, or materially jeopardize or interfere with the function, efficiency, or safety of, or the public's use or enjoyment of or access to the facility, service, or lands.

(L) Settlement patterns. To promote Vermont's historic settlement pattern of compact village and urban centers separated by rural countryside, a permit will be granted for a development or subdivision outside an existing settlement when it is demonstrated by the applicant that, in addition to all other applicable criteria, the development or subdivision:

(i) will make efficient use of land, energy, roads, utilities, and other supporting infrastructure; and

(ii)(I) will not contribute to a pattern of strip development along public highways; or

(II) if the development or subdivision will be confined to an area that already constitutes strip development, will incorporate infill as defined in 24 V.S.A. § 2791 and is designed to reasonably minimize the characteristics listed in the definition of strip development under subdivision 6001(36) of this title.

(10) Is in conformance with any duly adopted local or regional plan or capital program under 24 V.S.A. chapter 117. In making this finding, if the District Commission finds applicable provisions of the town plan to be ambiguous, the District Commission, for interpretive purposes, shall consider bylaws, but only to the extent that they implement and are consistent with those provisions, and need not consider any other evidence.

Party Status- 10 V.S.A. sec. 6085

• (c)(1) Party status. In proceedings before the District Commissions, the following persons shall be entitled to party status:

(A) the applicant;

(B) the landowner, if the applicant is not the landowner;

(C) the municipality in which the project site is located, and the municipal and regional planning commissions for that municipality; if the project site is located on a boundary, any Vermont municipality adjacent to that border and the municipal and regional planning commissions for that municipality; and the solid waste management district in which the land is located, if the development or subdivision constitutes a facility pursuant to subdivision 6602(10) of this title;

(D) any State agency affected by the proposed project;

(E) any adjoining property owner or other person who has a particularized interest protected by this chapter that may be affected by an act or decision by a District Commission.
