

AMP App Frequently asked Questions

- Do I have to pay for the App?
 - No, the App is free
- Does the State of Vermont track the use of the App?
 - While the State can determine how many times the App has been downloaded, the App is stored on your phone and is not connected in any way to a database managed or maintained by FPR or the State of Vermont.
- Does the App work in the woods where there is no internet access?
 - Mostly. The functions that **do not** work in an “unconnected” environment are the live links, the ability to create a new map in a job, and the soils map.
- How is the App different than the printed manual?
 - The App includes a searchable version of the printed manual that contains the exact same information and graphics as the printed manual. It has quick access buttons for the 4 tables which makes “flipping” through the manual quicker and easier.
 - The App has other tools that are not included in the printed manual such as an AMP cost calculator, Contact information for FPR staff, a link to the UC Davis SoilWeb site, a clinometer that calculates slope.
- How do I get the App on my phone?
 - The App can be found at the App Store or Google Play and can be used on most devices.
 - To download the App, search Vermont AMP.
